

WESTLAND SUMP PITS

LOADED WITH INNOVATIVE FEATURES TO GUARANTEE YEARS OF SERVICE.

Our tanks are built to last! Each of our sump pit tanks showcases the following features:

1. Strong and corrosion resistant
2. Made from durable polyethylene
3. Designed with a large flange to lock the tank into the concrete.
4. Precut cord and discharge pipe holes with supplied grommets
5. Sealed HDPE lid with neoprene gasket
6. Stainless steel hardware
7. Anti-flotation flange to lock the tank into the floor slab
8. Octagonal design gives multiple locations for weeping tile inlets and adds structure to the tank

MODEL	DESCRIPTION	CAPACITY	WEIGHT

SUMP PITS & SEWAGE LIFT STATIONS

Our sump pits are made of high-density polyethylene and serve to collect excess water from under your basement floor and foundation walls. We offer a variety of sump pits and building codes may dictate which pit is required in your area. Your plumber or foundation contractor will be the expert to consult with for which type of sump pit and pump to use.
