

CHEMWASH EMERGENCY WASH KIT

Made of rugged, heavy-duty polyethylene construction for years of reliable use

Convenient storage compartment is perfect for extra safety gloves and goggles

Newly redesigned steel mounting cradle allows wash kit to easily attach to any applicator

Perfect for agricultural or industrial applications, the CHEMWASH Emergency Wash Kit has a large 27 liter (7.15 US Gallon) reservoir to provide a source of fresh water on-site.

It can be easily welded or bolted onto any applicator or piece of equipment using the heavy duty steel cradle.

The included breakaway hose allows for fast, gravity-fed access to clean water for emergency rinsing, or use the spigot for controlled flow.

Each CHEMWASH Emergency Wash Kit comes complete with spigot, breakaway hose, all fittings, powder coated steel mounting cradle and dust cover for glove/goggle compartment. Created using high-strength polyethylene, the CHEMWASH Emergency Wash Kit will provide you with years of reliable and maintenance free use.
