

Advanced Chemical Induction System

BUILT FOR SPEED, SAFETY & COMPLETE CLEANOUT

A next-generation, high-performance chemical induction system engineered for modern agricultural spraying. Faster fills, cleaner rinses, and ergonomic handling — designed to keep your busy season moving.

AT A GLANCE

- Plunger valve flow control
- One of the fastest venturi systems on the market
- True total-drain tank— minimal residue
- Improved jug splitting knife with superior jug rinse
- Heavy-duty poly skid with integrated forklift pockets
- Multiple bulk draw configuration

KEY FEATURES & BENEFITS

TOTAL DRAIN TANK

True total-drain tank. Superior agitation without swirling, fast complete rinse-out, minimal residue.

HIGH-SPEED VENTURI

One of the fastest venturi systems on the market. Rapid induction and transfer for shorter fill times.

ENHANCED LID & JUG HANDLING

Angled lid improves jug positioning and stability. Easier splitting and rinsing reduces operator strain.

JUG SPLITTING KNIFE

Newly engineered knife with integrated stainless steel rinse tube. Superior jug rinse regardless of jug size.

ERGONOMIC RINSE & WATER CONTROL

Plunger valves provide continuous fresh water and quick on/off surge to fill the tank rinse a jug or the tank.

FLEXIBLE BULK DRAW

Un-metered or metered 4-port 1" or standard 2" bulk draw options.

WHY CHOOSE CHEM MANAGER

- ✓ Faster loading times
- ✓ Reduced operator fatigue
- ✓ Accurate metered mixing
- ✓ Cleaner tank rinsing
- ✓ Improved safety & ergonomics
- ✓ Built for high-efficiency operations

IDEAL APPLICATIONS

- Sprayer tender trucks
- Field mixing stations
- Custom application operations
- High-volume ag spraying systems
