The fastest, safest way to mix and move chemical.

JUG RINSE: The rinse tube with pulse action plunger valve completely rinses the jug right into the handle.

METERING: Tote, & bulk draw self-calibrating meter.

PLUNGER VALVES: 4 bank of plunger valves speeds up tank flush, tank rinse, jug rinse, and garden hose operations.

FAST INDUCTION: The Chem Manager has the fastest induction on the market today.

LABELLED HANDLES: The plunger and valve handles are laser labelled for ease of use.

ANGLED LID: The lid is tilted and at the edge of the tank for a safer & more ergonomic jug spike.

AGITATION: The twin jet agitators keep product in solution, and the tank shape prevents swirl of solution in tank.

LINE FLUSH: Bulk line flush to allow for complete system clean between products.

TOTE DRAW: 4 bank 1" metered tote/drum draw.

FRESH WATER: The garden hose attachment with pulse action plunger valve allows for quick and effective rinse.

BULK DRAW: 2" metered bulk draw.

SECURE LOAD: Secure the Chem Manager to the trailer with the pipe stand through the skid and bracket to the frame.

ANGLED LID: side view

AGITATION: inside view

SECURE LOAD: pipe stand

SECURE LOAD: side bracket

BUILT FOR SPEED, SAFETY & COMPLETE CLEAN-OUT.

CHEM MANAGER

Introducing our next-generation, high-performance chemical induction system designed for modern agricultural spraying. Faster fills, cleaner rinses, and ergonomic handling **to help keep your busy season moving.**
