Keep your flights moving and your batches accurate.

AGITATION: The twin jet agitators keep product in solution, and the tank shape prevents swirl of solution in tank.

METERING: Fresh water self-calibrating meter.

FRESH WATER: The garden hose attachment allows for quick and effective rinse.

PLUNGER VALVES: 4 bank of plunger valves speeds up jug rinse, tank fill x2, tank rinse.

FRESH WATER PUMP: 2", 5HP, three phase.

FILTRATION: Fresh and mixed solution have line filtration.

ANGLED LID: The lid is tilted and at the edge of the tank for a safer & more ergonomic jug spike.

AUXILIARY TANK: Double your mix volume to 320 USG.

DRONE FILL: Plumbed to fill a drone on a trailer deck, or on the ground.

CHEMICAL PUMP: 3 phase, ¾ HP electric pump.

SECURE LOAD: Secure the Drone Manager to the trailer with the pipe stand through the skid and bracket to the frame.

LABELLED HANDLES: The plunger and valve handles are laser labelled for ease of use.
